Your library assignment / search will involve several steps and result in the creation of an annotated APA style reference page on the topic of a career that is of interest to you. Completing this assignment will involve several steps.

1. Using the topic of your career choice, search the library for general materials on the specific career of interest to you. Your bibliography must include at least one item from the following five categories:
   a. A book (whole, part, chapter), not including:
      i. A textbook
      ii. A book on reserve for this course
   b. A newspaper or magazine article (e.g., Wall Street Journal, Business Week, Newsweek, NY Times, etc.)
   c. A scholarly journal (e.g., Academy of Management Review, Journal of Management, California Management Review, etc.)
   d. A government document or publication of a national or international agency
   e. A book review

2. Each item must be relevant to the topic of your career choice and available in the Boca Raton FAU library. The intent of the assignment is to get students to use the whole library; therefore, no more than two bibliographic items can be taken from an electronic source (internet, CD ROM, etc.). Include the internet address for a webpage citation.

3. Prepare the annotated bibliographic citation of each item. Consult the American Psychological Association (APA) style manual for a reference page format.

4. For each of your literature search items, you must provide evidence that you actually found the item in the Boca Raton FAU library. In most cases, a photocopy of the title page or the first page of an article will be sufficient evidence. These should be neat and attached to the back of your bibliography, in the same order they are listed in the bibliography.

5. Assemble your report in the following order:
   1. This assignment is your cover page
   2. Reference page
   3. Photocopied evidence
